

MEET THE TEACHER!

Hi, I'm Miss Kukathasan. I am really looking forward to welcoming you into Year 6. I am very excited to teach you all and work together to become the best learners. We are going to have lots of fun learning lots of new things.

See you all in September!

About Me

- I love reading and some of my favourite authors are Jaqueline Wilson, Michael Morpurgo and Roald Dahl.
- My favourite colour is green, but I also like blue.
- I also learned to play the violin.

Primary School

In Year 6, we will learn lots of exciting things throughout the year. In English, you'll have the opportunity to exercise your imagination and write for a range of purposes. In maths, we will extend your knowledge further by learning new mathematical concepts like algebra, ratio and proportion, while consolidating maths skills that you have already learnt. We will learn about the Mayans in history and the Amazon in geography. One of my favourite topics to teach is Crime and Punishment because it's so interesting to find out how people used to be punished for their crimes and how that's changed or stayed the same in our society today. In science, we'll learn about the human body, animals, evolution, light and electricity – lots of exciting things to look forward to. You will have a fantastic year!
